Education

- **University of Southern California** — Los Angeles, CA
  Master of Science in Computer Science — July 2020 – Dec. 2021

  Member of '20 Viterbi Summer Honors Program (VSOP), GPA: 3.95/4.0

- **University of California, Berkeley** — Berkeley, CA
  Bachelor of Arts in Computer Science — Aug. 2015 – May 2019

  Member of CSUA, Sports Analytics Group at Berkeley, Dean's List: Spring 2018, Spring 2019

Experience

- **Workday, Inc.** — Pleasanton, CA
  Software Development Engineer II — November 2020 – Present
  - Engineer for the reporting and analytics engine - a multi-tenanted, performant, in memory processing engine responsible for over 2 billion+ queries monthly.
  - Building *Cosmos* - a framework for delivered analytic data sources and applications; performs 5x faster than existing RaaS reports and incremental data extraction using delta caches saves 99%+ of compute time. Helped ideate, design, and implement data-pipeline integration with new acquisition Peakon.

- **Workday, Inc.** — Pleasanton, CA
  Software Development Engineer I — July 2019 – October 2020
  - Engineer for the web-server infra team responsible for all in/e-gress traffic into Workday; led team as scrum-master.
  - Delivered multi-step transaction processing framework for personas, a thread-level refactoring of platform level logging, and a REST streaming initiative with the VSS team, scanning all uploads/download within Workday.
  - Internships: Software Engineering Intern during the summers of 2017 and 2018; in 2017, designed and integrated a cross stack debugging micro-service within the web-server backend to detect & alert out errors and in 2018 built a full-stack, interactive scheduling platform for workforce management.

- **ServiceNow, Inc.** — Santa Clara, CA
  Cloud Platform Development Intern — May 2016 – Aug. 2016
  - Collected and aggregated platform usage analytic data for over 500+ customers for trend analysis and anomaly detection via machine learning models (e.g. gradient boosting, SVM) and reporting tools (e.g. Kibana, Tableau).

Research & Publications

- **Information Sciences Institute, USC** — Los Angeles, CA
  Researcher – **USC D-Security**, advised by Prof. Srivatsan Ravi. — Jan 2021 – Present

  My (broad) research interests are in privacy-preserving technologies and secure systems, particularly at the intersection of scalable distributed computing, data privacy, and machine learning. Currently, I'm looking into secure multi-party computation using applied cryptography. I was a graduate research asst. in the same group during my master's from July 2020 – Dec. 2021.
