

EDUCATION

- **University of Southern California** Los Angeles, CA
Master of Science in Computer Science July 2020 – Dec. 2021
Relevant Coursework: Analysis of Algorithms, Deep Learning & its Applications, Advanced Data Stores, Applied Cryptography, Security & Privacy in Big Data, **Member of 2020 Viterbi Summer Honors Program (VSOP)**
- **University of California, Berkeley** Berkeley, CA
Bachelor of Arts in Computer Science Aug. 2015 – May 2019
Relevant Coursework: Data Structures, Machine Learning, Advanced Algorithms, Databases, Networking, Operating Systems, Artificial Intelligence, Discrete Math and Probability Theory, Linear Algebra, Data Science, Computer Graphics

EXPERIENCE

- **Workday, Inc.** Pleasanton, CA
Software Development Engineer II Nov. 2020 – Present
I am a software engineer contributing to Workday's [Prism Analytics](#) product on the Business Intelligence (BI) team. Formerly, I was an engineer on the ui-server team working on scalable frameworks & infrastructure for our platform where I was a SDE 1 from July 2019 – Oct. 2020.
 - **BI Data Services:** Working on the **Reporting & Analytics Engine**, a multi-tenanted, high performance, in-memory processing engine to service over 1 billion monthly queries, and reports, dashboards, & visualizations built on those requests.
 - **UIS:** Developed **Hubs** (a multi-step transaction processing framework), contributed to **Dovah** (a thread-level refactoring of platform level logging), and led the **VSS Streaming** initiative (a REST streaming implementation to scan millions of uploads/downloads within Workday's various endpoints).
 - **Internships:** In 2018, built a **full-stack, interactive scheduling micro-system** for team scheduling and workforce management. & in 2017, delivered a **cross stack debugging microservice** for internal developers & external users to detect errors in the platform (scaled and dealt with millions of transactions per hour).
- **ServiceNow, Inc.** Santa Clara, CA
Cloud Platform Development Intern May 2016 – Aug. 2016
 - **Licensing & Usage Analytics:** Wrote scripts and generated key reports on user behavior & usage analytics using machine learning via Matlab, Kibana, and Tableau to analyze trends for over 500+ customers

RESEARCH

- **Information Sciences Institute, USC** Los Angeles, CA
Graduate Research Assistant – **USC D-Security**, advised by **Prof. Srivatsan Ravi**. July 2020 – Present
My research interests are in the intersection of scalable distributed computing, cyber-security, data privacy, machine learning and their applications to real-world problems.
 - **PPER:** Working on [privacy-preserving entity resolution](#) using fully homomorphic encryption and threshold FHE to compute in multi-party computational settings.
 - **SHELFI:** Implementing and analyzing encrypting model weights for privacy-preserving functionality within a secure, federated learning architecture.

PROJECTS

- **Morse Code Decoder:** CNN-LSTM-CTC deep learning model to decipher morse code irrespective of the medium used to generate it. Experiments and results can be found [here](#)
- **Real-time N-Body Cosmological Simulation:** N-Body cosmological simulation build with WebGL and ThreeJS to depict gas clouds coalescing with each other to form galaxies. Live demo and blog can be found [here](#).
- **NBA Awards Predictor:** Collection and comparison of ML algorithms and their corresponding predictions for NBA awards utilizing data from 2000-2019.
- **Protein Structure Reconstruction:** Using FFT and backprojection, reconstructed a 3D visualization of a zika virus from a 2D image. Full write-up and experiments can be found [here](#).

PROGRAMMING SKILLS

- **Languages:** Java, C++, Python, JS, SQL, Scala **Technologies:** Kafka, Spring, PyTorch, Hadoop, Spark
