#### **EDUCATION**

## University of Southern California

Los Angeles, CA

Master of Science in Computer Science

July 2020 - Dec. 2021

Email: tanmayghai@berkeley.edu // tghai@usc.edu

Relevant Coursework: Analysis of Algorithms, Deep Learning & its Applications, Advanced Data Stores, Applied Cryptography, Security & Privacy in Big Data, Member of 2020 Viterbi Summer Honors Program (VSOP)

### University of California, Berkeley

Berkeley, CA

Bachelor of Arts in Computer Science

Aug. 2015 - May 2019

Relevant Coursework: Data Structures, Machine Learning, Advanced Algorithms, Databases, Networking, Operating Systems, Artificial Intelligence, Discrete Math and Probability Theory, Linear Algebra, Data Science, Computer Graphics

### EXPERIENCE

Workday, Inc.

Pleasanton, CA

Software Development Engineer II

Nov. 2020 - Present

I am a software engineer contributing to Workday's Prism Analytics product on the Business Intelligence (BI) team. Formerly, I was an engineer on the ui-server team working on scalable frameworks & infrastructure for our platform. Additionally, I was a SDE 1 from July 2019 – Oct. 2020.

- BI Data Services: Working on the Reporting & Analytics Engine, a multi-tenanted, high performance, in-memory processing engine to service over 1 billion monthly queries, and reports, dashboards, & visualizations built on those requests.
- **UIS**: Developed **Hubs** (a multi-step transaction processing framework), contributed to **Dovah** (a thread-level refactoring of platform level logging), and led the **VSS Streaming** initiative (a REST streaming implementation to scan millions of uploads/downloads within Workday's various endpoints).
- Internships: In 2018, built a full-stack, interactive scheduling micro-system for team scheduling and workforce management. & in 2017, delivered a cross stack debugging microservice for internal developers & external users to detect errors in the platform (scaled and dealt with millions of transactions per hour).

ServiceNow, Inc.

Santa Clara, CA

Cloud Platform Development Intern

May 2016 – Aug. 2016

• Licensing & Usage Analytics: Wrote scripts and generated key reports on user behavior & usage analytics using machine learning via Matlab, Kibana, and Tableau to analyze trends for over 500+ customers

### RESEARCH

### Information Sciences Institute, USC

Los Angeles, CA

Graduate Research Assistant - USC D-Security, advised by Prof. Srivatsan Ravi.

July 2020 - Present

My research interests are in the intersection of scalable distributed computing, cyber-security, data privacy, machine learning and their applications to real-world problems.

- PPER: Working on privacy-preserving entity resolution using fully homomorphic encryption in distributed systems and multi-party computational systems.
- SHELFI: Implementing and analyzing performance of private-aggregation functions integrated into the SHELFI architecture (Secure Heterogeneous Learning Federation with Information-Theoretic Guarantees).

#### PROJECTS

- Morse Code Decoder: CNN-LSTM-CTC deep learning model to decipher morse code irrespective of the medium used to generate it. Experiments and results can be found here
- Real-time N-Body Cosmological Simulation: N-Body cosmological simulation build with WebGL and ThreeJS to depict gas clouds coalescing with each other to form galaxies. Live demo and blog can be found here.
- NBA Awards Predictor: Collection and comparison of ML algorithms and their corresponding predictions for NBA awards utilizing data from 2000-2019.
- Protein Structure Reconstruction: Using FFT and backprojection, reconstructed a 3D visualization of a zika virus from a 2D image. Full write-up and experiments can be found here.

### Programming Skills

• Languages: Java, C++, Python, JS, SQL, Scala Technologies: Kafka, Sp

**Technologies**: Kafka, Spring, PyTorch, Hadoop, Spark
